Summary

Software Engineer skilled in Python, FastAPI, React.js, and full-stack development. Experienced in building scalable backend systems, REST APIs, AI-powered applications, and modern web solutions. Proficient in SQL, PostgreSQL, Elasticsearch, and cloud-based development with strong problem-solving skills.

Skills

- **Programming:** Python, TypeScript, JavaScript, SQL, HTML5, CSS3
- **Frameworks & Libraries:** React.js, FastAPI, SQLAlchemy, LangChain, Tailwind CSS, Vite
- **Databases & Cloud:** PostgreSQL, Oracle DB, ChromaDB, Elasticsearch, Azure, OCI, Docker
- **Tools & Concepts:** Git, GitHub, REST APIs, AsyncIO, JWT, OAuth2, Agile, SDLC

Professional Experience

Software Development Intern

Neo Green Labs, Ernakulam, Kerala

May 2023

- Built responsive web interfaces using HTML5 and CSS3, improving user engagement by 25%
- Developed backend modules in Python to enhance system speed and reliability by 20%
- Participated in Agile ceremonies including daily standups, sprint planning, and reviews.
- Handled debugging, unit testing, and documentation within full SDLC workflows.

Python Intern

NextGenPro Innovations & Edupark Pvt. Ltd, Ernakulam

March 2025

- Completed hands-on internship focused on backend development using Python and Django.
- Worked on understanding core web development concepts, backend logic, and Django framework structure.
- Gained practical exposure to building and managing web application components.
- Performed debugging, testing, and code improvements under guidance.

Education

B. Tech in Computer Science and Engineering

Carmel College of Engineering & Technology, Alappuzha, Kerala

2021 – 2025

GPA: 9.26/10.0

Higher Secondary Education (12th Standard)

SN Trust Higher Secondary School, Pallipad, Kerala

2019 – 2021

Percentage: 97%

Projects

Expert System for Detection and Grading of Depression in Youngsters

- Developed a multimodal AI system to automate the detection and grading of depression in youth.
- Designed advanced deep learning architectures to perform feature extraction and classification on data.
- Applied computer vision and signal processing techniques to improve data quality and model accuracy.

AI Multi-Agent Orchestration System

- Developed a multi-agent system using Azure OpenAI for workflow automation and intelligent query handling.
- Built SQL, HR policy, and email agents for database querying, policy assistance, and email generation.
- Implemented natural language to SQL conversion with context-aware response generation and automated enterprise workflows.

Patents & Publications

- **Patent:** Co-inventor of “AI-Based Fertiliser Generation Device From Waste”, Registered Design (Design No. 462514-001), The Patent Office, Government of India.
- **Publication:** Co-author of “Expert System for Detection and Grading of Depression in Youngsters”, presented at ICCNet-2025, Manchester, UK.
